BPO Knowledge Copilot — Synthetic Knowledge Articles

Portfolio-safe synthetic content for our RAG project. Not real company policy.

CLM-001 — Claim Denied but Policy Was Active

Category: Claims

Scenario: Customer says a claim was denied even though coverage was active on the date of service.

Procedure: Verify member; check effective and termination dates; verify date of service; review denial reason; follow approved reconsideration workflow.

Escalation: Escalate if eligibility conflicts or the denial cannot be resolved by the approved process.

Search aliases: claim denied|rejected claim|coverage active|policy active|date of service

CLM-002 — How to Check Claim Status

Category: Claims

Scenario: Customer wants the current status of a submitted claim.

Procedure: Verify identity and claim details; review latest status and status date; explain using approved terminology.

Escalation: Escalate if beyond the applicable processing timeframe or status is inconsistent.

Search aliases: claim status|claim update|where is my claim|claim pending

CLM-003 — Claim Reconsideration Request

Category: Claims

Scenario: Customer asks for a previously denied claim to be reviewed again.

Procedure: Verify claim number; review denial reason; determine whether reconsideration is permitted; collect required information; submit through approved workflow.

Escalation: Escalate if outside the standard reconsideration process.

Search aliases: appeal claim|reconsideration|review denied claim|challenge denial

CLM-004 — Duplicate Claim

Category: Claims

Scenario: The same service may have been submitted more than once.

Procedure: Verify claim numbers, provider, amount and date of service; compare records; follow duplicate-claim procedure.

Escalation: Escalate when duplicate status cannot be determined.

Search aliases: duplicate claim|same claim twice|duplicate submission

CLM-005 — Missing Claim Information

Category: Claims

Scenario: A claim cannot be processed because required information is missing.

Procedure: Identify missing information; explain what is required; document interaction; follow approved resubmission process.

Escalation: Escalate if required fields cannot be updated or records conflict.

Search aliases: missing claim data|claim incomplete|resubmit claim

CLM-006 — Incorrect Date of Service

Category: Claims

Scenario: Customer reports the date of service on a claim is incorrect.

Procedure: Verify claim/member details; compare reported date with records; follow correction or resubmission process.

Escalation: Escalate if the correct date cannot be validated.

Search aliases: wrong service date|date correction|claim date

ELG-001 — Check Eligibility on a Specific Date

Category: Eligibility

Scenario: Agent needs to determine whether a member was covered on a particular date.

Procedure: Verify identity; check effective date; check termination date; compare dates with the date being investigated.

Escalation: Escalate if approved systems show conflicting eligibility.

Search aliases: eligibility check|covered on date|coverage verification|active coverage

ELG-002 — Policy Shows Inactive

Category: Eligibility

Scenario: Customer says coverage should be active but the system shows inactive.

Procedure: Verify identity; review dates; check recent updates; follow approved status-correction process.

Escalation: Escalate when status cannot be reconciled.

Search aliases: inactive policy|coverage inactive|should be active|policy status

ELG-003 — Coverage Effective Date

Category: Eligibility

Scenario: Customer asks when coverage started.

Procedure: Verify identity; retrieve policy record; confirm effective date; communicate approved information.

Escalation: Escalate if date is missing or inconsistent.

Search aliases: coverage start date|effective date|when coverage started

ELG-004 — Coverage Termination Date

Category: Eligibility

Scenario: Customer asks when coverage ended.

Procedure: Verify identity; retrieve policy record; confirm termination date when available.

Escalation: Escalate if records conflict or termination information is unavailable.

Search aliases: coverage end date|termination date|when coverage ended

ELG-005 — Eligibility System Mismatch

Category: Eligibility

Scenario: Two approved systems show different eligibility information.

Procedure: Verify member details; compare identifiers and dates; document mismatch; do not make unsupported coverage decisions.

Escalation: Escalate to eligibility support.

Search aliases: eligibility mismatch|systems disagree|coverage conflict

ELG-006 — Dependent Eligibility

Category: Eligibility

Scenario: Customer asks whether a dependent is currently covered.

Procedure: Verify member/dependent details; check dependent coverage dates; provide permitted information.

Escalation: Escalate if dependent record is missing or inconsistent.

Search aliases: dependent coverage|child eligibility|dependent active

BIL-001 — Duplicate Charge

Category: Billing

Scenario: Customer reports being charged twice for the same transaction.

Procedure: Verify customer and transaction details; compare dates and amounts; determine whether charges are duplicates; follow correction/refund process.

Escalation: Escalate if transaction cannot be validated.

Search aliases: charged twice|double charge|duplicate payment

BIL-002 — Refund Status

Category: Billing

Scenario: Customer asks when an approved refund will be received.

Procedure: Verify refund reference; check status; communicate applicable processing timeframe.

Escalation: Escalate if refund exceeds approved timeframe.

Search aliases: refund pending|refund status|where is my refund

BIL-003 — Payment Failed

Category: Billing

Scenario: A payment attempt failed.

Procedure: Verify transaction status; review approved failure reason; follow payment-retry procedure.

Escalation: Escalate if funds appear deducted despite failed status or status is inconsistent.

Search aliases: payment failed|payment declined|transaction failed

BIL-004 — Unexpected Billing Amount

Category: Billing

Scenario: Customer says billed amount differs from what they expected.

Procedure: Verify invoice/transaction; compare amount with applicable plan/service details; explain supported information.

Escalation: Escalate if amount cannot be reconciled.

Search aliases: wrong amount|unexpected charge|billing discrepancy

BIL-005 — Invoice Copy Request

Category: Billing

Scenario: Customer needs a copy of an invoice.

Procedure: Verify identity; locate invoice; provide or direct to approved invoice-access method.

Escalation: Escalate if invoice cannot be located.

Search aliases: invoice copy|billing statement|receipt

BIL-006 — Payment Reversal

Category: Billing

Scenario: Customer says a payment was reversed or returned.

Procedure: Verify payment record; review reversal reason; explain approved next payment step.

Escalation: Escalate if reason is unavailable or disputed.

Search aliases: payment reversed|payment returned|reversal

ENR-001 — New Enrollment Request

Category: Enrollment

Scenario: Customer wants to enroll in an available plan or service.

Procedure: Verify eligibility; explain approved options; collect required details; complete enrollment workflow.

Escalation: Escalate if eligibility cannot be verified or system is unavailable.

Search aliases: enroll|new enrollment|sign up|join plan

ENR-002 — Enrollment Status

Category: Enrollment

Scenario: Customer asks whether a recent enrollment request was completed.

Procedure: Verify identity; locate record; check status; communicate current status and next step.

Escalation: Escalate if request exceeds expected timeframe.

Search aliases: enrollment status|application status|enrollment pending

ENR-003 — Incorrect Enrollment Information

Category: Enrollment

Scenario: Customer says information submitted during enrollment is incorrect.

Procedure: Verify identity; identify incorrect field; determine whether it can be corrected; document request.

Escalation: Escalate when field cannot be corrected normally.

Search aliases: wrong enrollment information|correct enrollment|update application

ENR-004 — Enrollment Cancellation

Category: Enrollment

Scenario: Customer asks to cancel a recent enrollment request.

Procedure: Verify identity/status; determine whether cancellation is permitted; follow cancellation procedure.

Escalation: Escalate if already finalized.

Search aliases: cancel enrollment|withdraw enrollment|stop enrollment

ENR-005 — Plan Change Request

Category: Enrollment

Scenario: Customer asks to change from one plan to another.

Procedure: Verify eligibility and plan-change rules; explain approved options; follow plan-change workflow.

Escalation: Escalate if requested change is outside allowed process.

Search aliases: change plan|switch plan|plan transfer

ENR-006 — Enrollment Confirmation

Category: Enrollment

Scenario: Customer needs confirmation that enrollment was submitted successfully.

Procedure: Verify identity; locate record; confirm status; provide approved confirmation details.

Escalation: Escalate if no record can be found.

Search aliases: enrollment confirmation|proof of enrollment|submitted enrollment

MEM-001 — Member Authentication

Category: Member Support

Scenario: Agent needs to verify identity before discussing account-specific information.

Procedure: Follow approved authentication questions and verify required identifiers before disclosure.

Escalation: Escalate if authentication fails or extra verification is required.

Search aliases: verify identity|authenticate customer|member verification

MEM-002 — Address Update

Category: Member Support

Scenario: Customer wants to update a mailing or contact address.

Procedure: Complete authentication; collect new address; update using approved workflow; confirm submission.

Escalation: Escalate if address cannot be updated.

Search aliases: change address|update address|mailing address

MEM-003 — Phone or Email Update

Category: Member Support

Scenario: Customer wants to change phone number or email.

Procedure: Authenticate; collect new contact information; update using approved workflow; confirm update.

Escalation: Escalate if update fails or extra verification is required.

Search aliases: change phone|change email|contact update

MEM-004 — Replacement Member Card

Category: Member Support

Scenario: Customer requests a replacement member card.

Procedure: Verify identity; check member record; determine eligibility; follow card-request process.

Escalation: Escalate if record prevents request.

Search aliases: replacement card|new member card|lost card

MEM-005 — General Account Inquiry

Category: Member Support

Scenario: Customer asks about an issue that does not clearly match another category.

Procedure: Authenticate; clarify issue; search approved knowledge base; document interaction.

Escalation: Escalate if no approved article addresses it.

Search aliases: general inquiry|account help|unknown issue

MEM-006 — Privacy or Restricted Information

Category: Member Support

Scenario: Customer asks for information that may be protected or restricted.

Procedure: Authenticate; determine whether information may be disclosed; follow privacy procedure.

Escalation: Escalate requests outside approved disclosure process.

Search aliases: privacy|restricted information|protected information

ESC-001 — Supervisor Escalation

Category: Escalations

Scenario: Agent cannot resolve an issue using available knowledge and standard procedures.

Procedure: Confirm standard troubleshooting; document issue/actions; route to supervisor or SME.

Escalation: Escalate when authority, access, or a decision outside the agent role is required.

Search aliases: supervisor|SME|escalate case|manager help

ESC-002 — System Incident Escalation

Category: Escalations

Scenario: Required system is unavailable or produces an error that blocks case handling.

Procedure: Capture error and non-sensitive details; check incident procedure; document impact.

Escalation: Escalate according to system incident process.

Search aliases: system error|system down|outage|application error

ESC-003 — Knowledge Gap

Category: Escalations

Scenario: Agent cannot find an article that answers a new customer scenario.

Procedure: Search relevant terms; confirm no applicable article; document question and impact.

Escalation: Escalate to SME/knowledge team and flag as potential knowledge gap.

Search aliases: knowledge gap|no article|new scenario|KB missing

ESC-004 — Urgent Escalation

Category: Escalations

Scenario: Customer situation matches an approved urgent-escalation condition.

Procedure: Verify required information; follow urgent escalation route; do not promise unauthorized outcomes.

Escalation: Use the urgent route defined by the process.

Search aliases: urgent issue|priority escalation|critical case

ESC-005 — Conflicting Knowledge Articles

Category: Escalations

Scenario: Two approved articles appear to give different instructions.

Procedure: Check version/effective date; do not choose based on preference; document conflict.

Escalation: Escalate to knowledge-management/SME team.

Search aliases: conflicting articles|different instructions|KB conflict|version conflict

ESC-006 — Out-of-Scope Request

Category: Escalations

Scenario: Customer asks for an action outside agent responsibilities.

Procedure: Explain approved options; document request; follow transfer/escalation process.

Escalation: Escalate or transfer according to ownership.

Search aliases: out of scope|transfer|wrong department|unsupported request

COM-001 — Customer Requests a Supervisor

Category: Communication

Scenario: Customer explicitly asks to speak with a supervisor.

Procedure: Acknowledge request; understand reason; follow supervisor-escalation process; document.

Escalation: Transfer/escalate according to policy.

Search aliases: speak to manager|supervisor request|manager request

COM-002 — Customer Is Frustrated

Category: Communication

Scenario: Customer is upset or repeatedly explains the same problem.

Procedure: Acknowledge concern; listen; summarize issue; explain next actionable step using approved information.

Escalation: Escalate if requested or if criteria are met.

Search aliases: angry customer|frustrated customer|customer upset|de-escalation

COM-003 — Customer Requests a Policy Exception

Category: Communication

Scenario: Customer requests an exception to a standard rule.

Procedure: Clarify request; explain standard process; do not promise exception; check approved exception path.

Escalation: Escalate when authorized exception decision is required.

Search aliases: policy exception|special request|override

COM-004 — Customer Wants Immediate Resolution

Category: Communication

Scenario: Customer demands an outcome that requires processing time or another team.

Procedure: Explain what can be completed now; provide approved next step/timeframe; avoid unsupported promises.

Escalation: Escalate if approved urgent criteria apply.

Search aliases: immediate resolution|urgent customer|need it now

QA-001 — Required Verification Missing

Category: Quality

Scenario: Quality review finds an agent missed a required verification step.

Procedure: Identify missed verification; document QA finding; provide coaching using approved quality framework.

Escalation: Escalate compliance-related issues per QA policy.

Search aliases: QA failure|verification missed|quality audit|compliance

QA-002 — Incorrect Information Provided

Category: Quality

Scenario: Quality review finds information given by an agent was unsupported by the knowledge base.

Procedure: Compare response with current article; correct coaching/knowledge issue; document finding.

Escalation: Escalate if article itself is outdated or conflicting.

Search aliases: wrong information|QA defect|incorrect answer|knowledge accuracy

QA-003 — Knowledge Article Feedback

Category: Quality

Scenario: Agent finds an article unclear, outdated, incomplete, or hard to use.

Procedure: Record article ID; describe issue; provide example scenario; submit feedback.

Escalation: Escalate immediately if incorrect guidance could affect customers/compliance.

Search aliases: article feedback|outdated article|unclear article|KB feedback

QA-004 — Knowledge Article Version Check

Category: Quality

Scenario: Agent needs to determine whether an article is current.

Procedure: Check version and effective date; use latest approved version; do not rely on unofficial copies.

Escalation: Escalate if multiple active versions appear.

Search aliases: article version|effective date|latest article|outdated KB
